

Student Presentations

ADV1162

Instructor: Genevieve Hitchings

Designers:

Over the course of the semester each of you will be asked to create a five-ten minute presentation on one of the noted designers listed below.

- Presentations should be visual and about the work of the designer. You should show eight to ten selections of the designer's most noted work.
- You must also provide a synopsis of the designer's background. Keep a careful record of all the sources you use for this presentation. You will be asked to hand in a one-page summary of your presentation along with a bibliography of references.
- How you decide to present the designer's work is up to you. You will be required to show their work on the big screen in the classroom. You can create a PowerPoint presentation, you can walk us through the designer's website, you can collect a series of images in a folder and present their work from the folder. Whichever way you decide to show their work, your presentation should be organized and demonstrate thorough research on your part.
